Skills

IT Support	●●●●●
Hardware troubleshooting	●●●●●
Networking (IP, DHCP, DNS, VLANs, WiFi Troubleshooting)	●●●●●
Windows OS Administration	●●●●●
Software Installation & Configuration	●●●●●

Profile

Detail-oriented IT professional with a solid background in computer science and information technology, skilled in managing and maintaining computer systems as well as supporting end-users efficiently. Experienced in installation, configuration, and troubleshooting within Windows and Linux environments, with a keen interest in integrating web development skills to provide comprehensive technical support.

Education

Diploma in Computer Science

Oct 2023 - Jul 2025

KIUT

- Gained in-depth understanding of computer hardware architecture and system components essential for troubleshooting and maintenance.
- Acquired foundational skills in programming and web development including HTML, CSS, and JavaScript suitable for junior web development roles.
- Developed proficiency in operating system installation, configuration, and management for both Windows and Linux environments.
- Studied database management basics and software application integration to enhance system functionality and user support.
- Mastered IT support methodologies such as user assistance, system backups, hardware and software troubleshooting, and preventive maintenance.
- Learned software development life cycles and applied problem-solving techniques in coding assignments.

Certificate in Information Technology

Oct 2022 - Jul 2023

Kampala International University in Tanzania, Dar es salaam

- Acquired foundational knowledge in computer hardware components, system assembly, and troubleshooting techniques.
- Learned installation, configuration, and maintenance of various operating systems including Windows and Linux.
- Studied web development fundamentals including HTML, CSS, and introductory JavaScript, preparing for junior web developer tasks.
- Mastered essential IT support processes including user support, system backups, and preventive maintenance to ensure operational efficiency.

Uganda Certificate of Education

Mar 2013 - Nov 2016

Seeta High School-Mukono, Mukono, Uganda

- Developed foundational skills in computer literacy, including basic software applications and operating systems.
- Studied principles of information and communication technology relevant to IT support roles.
